ICI - INTERNATIONAL WEBINAR

on 30th May 2020, Saturday at 3.00 PM to 5.00 PM (IST)

The Topic of the Webinar is

New Innovations and Material Systems for HIGH PERFORMANCE CONCRETES

CONCRETE – is the most consumed material in the World, next only to water. Today, large scale Construction projects cannot be thought of without Concrete. The Olympic motto of "Higher, Faster, Stronger" seems to be exactly similarly to the performance demand of Concrete today. As buildings 'grow' taller and projects become bigger, the Construction Industry professional's goal is to provide best-in-class construction materials. Materials that meet the ever perpetual need of time-cost-quality-environment-safety and also have characteristics precisely addressing the changing dynamics of local/regional requirements are the need of the hour. **HIGH PERFORMANCE CONCRETE**, HSC in short, is that material which precisely meets all these aspirations and more. Whats more, HSC offers itself to innovation and upgrade.

HIGH PERFORMANCE CONCRETE is the Smart Material of today. All Stake holders in any Construction project necessarily need to have proper understanding of this agile and versatile material as well as understand the immense intrinsic advantages that provides. To ensure that maximum benefit accrues by adopting, one also needs to have a proper understanding of Design, preparation and placing of this amazing material.
