## Important Events & Programs from ICI (BENC)

- Monthly technical lectures, Endowment Lectures, National Workshops and Conferences.
- ICI (BENC) was the first to organize ICI (Innovative World of Concrete) in 1993, ICI ACECON in 2000.
- ICI (BENC) is the first centre among all the centres of ICI in India to start Concrete Panorama and Deminars (from 2009 till date)
- Training modules on Concrete and Concrete Technology for various organizations and institutions. These programs are conducted throughout the year to cater for the specific needs of the organizations concerned.

## Concrete Days Celebrations

Indian Concrete Institute (Bengaluru Centre) celebrate concrete day on 7th September.

Every year this event is celebrated in a grand and befitting manner.

Every year during the Concrete Day Celebrations, ICI (BENC) in association with Ultratech Cements Limited recognizes outstanding and innovative structures built using concrete as main construction material and also identify and honour an individual who has worked for the cause of Concrete and rendered significant contributions to the research, development and application of concrete.

The 5 prestigious awards conferred during Concrete day celebrations are:

- ICI (BENC) - Ultratech Award for Outstanding Concrete Engineer of Karnataka / Outstanding Concrete Teacher of Karnataka & Emerging Concrete Engineer of Karnataka
- ICI (BENC) - Birla Super Award for Outstanding Concrete Structure of Karnataka
- ICI (BENC) - UltraTech "Well Built Residential Awards for Districts"
- ICI (BENC) - UltraTech Award for Outstanding Student Chapter
- ICI (BENC) - UltraTech Awards for Outstanding Thesis: Masters / Doctoral

## National Hybrid Conference on

### "Research and Innovations in Civil Engineering and Architecture"

from 28th-30 July 2022. Hybrid (both online and offline).

#### ABOUT THE CONFERENCE

The objective of this conference is to provide a platform for academicians and researchers to exchange and share their knowledge, experiences and research results on all aspects of Civil Engineering applications and Architectural. It also provides a premier interdisciplinary platform for researchers, practicing Engineers and Architects and educators to present and discuss the most recent innovations, trends, and concerns as well as practical challenges encountered and solutions. Prospective authors are kindly encouraged to contribute to and help shape the conference through submissions of their research abstracts, papers and e-posters. Also, high quality research contributions describing original and unpublished results of conceptual, constructive, empirical, experimental, or theoretical work in all areas of Civil Engineering are cordially invited for presentation at the conference. The conference solicits contributions of abstracts, papers and e-posters that address themes and topics of the conference, including figures, tables and references of novel research materials.

#### CHIEF PATRONS

ONE DAY NATIONAL SEMINAR

### Advancements in Waterproofing Systems for Concrete Structures

On 30th January 2023, Monday at 9.00 am  
Venue: Dr. D Premachandra Sagar Auditorium,  
Dayananda Sagar College of Engineering, Bengaluru.

#### Waterproofing of Concrete Structures:

Concrete is one of the most utilized construction materials in the world. However, to realize its maximum potential lifespan, steps must be taken to prevent premature deterioration. Options to effectively waterproof concrete structures include a variety of integral & non-integral products and systems. As with many things, the wide range of products available in the marketplace can sometimes be more confusing than helpful. Hence, it becomes paramount to understand the importance of long-term structural integrity of concrete construction, identify and mitigate the main causes of concrete deterioration, ensure sustainability of new materials and waterproofing agents with an emphasis to understand the science behind them. The primary objective of all Waterproofing systems needs to be similar i.e., to prevent the ingress of water, chemicals etc. into the matrix of concrete so as to ensure durability and performance characteristics considerably. As per the experts, more than 40% of the failures in concrete structures occur due to ingress of chemicals and water at micro and macro level.

Waterproofing of new as well as existing concrete structures should take into consideration the type and severity of problem expected and unexpected as well as the appropriate treatment to be rendered – Integral & Non-integral. New-age Waterproofing systems, with the incorporation of innovative materials and technologies, have become more efficient, effective, and substantial, possessing properties that can reduce maintenance and improve sustainability. For all the above to happen, the imminent need of knowledge about the recent advancements in the field waterproofing systems is vital.

#### Who should attend:

- Construction & Infrastructure Industry professionals
- Builders & Developers
- Government/LU/ Construction Departments
- Landmark structures/Statues/ Towers
- Structural Design Engineers
- Corporate Planning Built-work-facilities
- Waterproofing Service providers
- Academicians, Students, Researchers & Innovators

In line with this objective, Indian Concrete Institute -Bengaluru Centre, is organising a one-day national seminar titled "Advancements in Waterproofing Systems for Concrete Structures" on Monday, 30th January 2023 at Dayananda Sagar College of Engineering, Bengaluru. Experts in this sector will share their experience on vital aspects with an emphasis on application-oriented approach. We look forward to meeting you at this seminar for a fruitful experience in the field and skill development.

**Brief about speaker**

Dr.Vishal Ramesh Thombare, Ph.D, IIT-Bombay. Executive Engineer Roads, BrihanMumbai Municipal Corporation (BMC). He was earlier associated with Indian Rayon and Industries Ltd-Cement Division (now Ultra-Tech Cement) in Shoppee concept in Cement industry. He developed various Mixes for High Performance Concrete. He joined BMC in the year 1997. He worked in Quality Control, Planning and Research department playing key role in making Master Plan for Mumbai City for the next 25 years. He worked with Coastal Road Project for six years. He has over 26 years of experience in the Civil Engineering field.

Dr.Vishal R.Thombare was instrumental in the implementation of Ultra-Thin White Topping in Mumbai, Thane, Bangalore, Chennai and different parts of our Country. He is the first Engineer in India to use M60 Grade Concrete in UTWT and TWT. Dr. Vishal Thombare is the recipient of ‘Outstanding Engineer’ Award in the year 2008, 2009 and 2022 on the occasion of Engineer’s Day. He has also been awarded the Bharatratna Mokshagundam Visvesvaraya Engineer -2018 award. In the same year he received Samaj Bhushan award. In January 2023 he received the Construction Times Award in New Delhi.

**Brief about the Lecture**

Concrete overlays on Roads are extremely vital to extend the service life, to increase structural capacity, and improve the ride quality of existing Concrete, Asphalt, and Composite Pavement structures. Initially it was reckoned to be used only for repair and decorative purpose. But of late, Concrete overlays have become an integral and ‘must-have’ part of any Rigid or Flexible pavement. However, they are more popular over rigid pavements. They have demonstrated their viability as a cost-effective solution to extend the service life of deteriorated Asphalt, Concrete and Composite Pavements. Well-designed and well-constructed thin concrete overlays require low maintenance and can have low life-cycle costs.

Evening Technical Lecture

“Climate Change and How Civil Engineers can Reduce Carbon Footprints”  
By Er. Vijay Kulkarni, on Friday, 28th April, 2023 at 6.30 P.M.

INVITATION TO TECHNICAL EVENING LECTURE	
 <b>INDIAN CONCRETE INSTITUTE - BANGALURU CENTRE.</b> Website: <a href="http://www.icikbc.org">www.icikbc.org</a>	 <b>BANGALORE INSTITUTE OF TECHNOLOGY, K.R.Road, BANGALURU.</b> Website: <a href="https://bit-bangalore.edu.in/">https://bit-bangalore.edu.in/</a>
Speaker:	Er. Vijay Kulkarni, Founder Director, Low Carbon Construct Forum (LCCF), Partner, Midas Techfin Consultants LLP.
Topic:	Climate Change and How Civil Engineers can Reduce Carbon Footprints
Date:	Friday, 28th April, 2023, Time : 6.30PM - 8.00 PM (IST)
Venue:	BANGALORE INSTITUTE OF TECHNOLOGY (BIT), Seminar Hall, 2nd Floor, K R Road, V V Puram, Bangalore-560004
<b>ABOUT THE LECTURE</b> The climate change phenomenon, manifested through unprecedented level of global warming from greenhouse gas (GHG) emissions - mainly CO2 emission - is one of the most serious challenges, threatening the very existence of human civilization. The adverse effects of climate change are being seen through steep rise in disasters - floods, droughts, storms, droughts, wildfires, etc. Day-by-day, the danger of such disasters are increasing all over the world. India is more vulnerable to these disasters. Construction sector and the built environment are the main consumers of natural resources – energy, materials, water and land. The recent status report from the Global Alliance of Building and Construction revealed that the energy-related CO2 emission from the building and construction sectors was as high as 38% of the total global emissions! Is it possible to reduce carbon emissions from built environment? Yes! Certainly! In recent years, a Plethora of literature is published on different facets of this issue. Low Carbon Construct Forum (LCCF), has been launched two years back with a specific objective of creating awareness amongst Engineers, Architects, Academics, etc. on this issue. Er. Vijay Kulkarni, Past President of Indian Concrete Institute (ICI) and currently the Co-Chair of the Technical Board of ICI, is the Founder Director of LCCF. He has been delivering lectures on this topic in various forums, covering the Indian Scenario on climate change and suggesting measures to reduce carbon footprints.	
<b>ABOUT THE SPEAKER</b> Vijaykumar R. Kulkarni has more than Four Decades of experience in various spheres of concrete and construction - ready-mixed concrete, R&D in concrete, NDT and health monitoring of structures, high-strength/high-performance concrete, climate change, sustainability, and technical dissemination and writing. After a long stint with a cement major, he was the Principal Consultant to Ready Mixed Concrete Manufacturers' Association and contributed immensely to the development and implementation of Quality Scheme for RMC in India. He was awarded the "Outstanding Concrete Technologist" award by Indian Concrete Institute (ICI). He also received a Gold Medal for Best Paper on Rigid Pavements for Mumbai-Pune Expressway from the Indian Roads Congress. Currently, he is continuing his Consultancy and R&D work in Concrete as the Partner in Midas Techfin Consultants LLP. He was the President of the Indian Concrete Institute (ICI) Mumbai during 2009-11 and is currently the Co-Chair of ICI's Technical Board. He is also the Chair of the GreenPro Concrete Certification carried out by the CI's Green Business Centre. He has published/presented around 70 technical papers and was the past Editor of the Indian Concrete Journal. Mr Kulkarni is the founder Director of Low Carbon Construct Forum (LCCF), which is passionately spearheading awareness about the need to reduce carbon footprints in construction. LCCF publishes a bi-monthly Newsletter. <b>AUDIENCE: ALL THOSE IN THE CIVIL ENGINEERING PROFESSION, ROAD INFRASTRUCTURE, STUDENTS/ACADEMICIANS &amp; ASSOCIATED INDUSTRY PROFESSIONALS VIZ. MATERIAL SUPPLIERS, EQUIPMENT MANUFACTURERS, SERVICE PROVIDERS, CONTRACTORS ETC., ARE CORDIALLY INVITED</b>
