

INDIAN CONCRETE INSTITUTE - BENGALURU CENTRE

Organises

1-DAY NATIONAL SEMINAR ON *HIGH STRENGTH CONCRETE*

On 13th February 2019, Wednesday.

Venue: The Capitol Hotel, Raj Bhavan Road, Bengaluru – 560 001.

CONCRETE – is the most consumed material in the World, next only to water. Today, large scale Construction projects cannot be thought of without Concrete. The Olympic motto of “Higher, Faster, Stronger” seems to be exactly similarly to the performance demand of Concrete today. As buildings ‘grow’ taller and projects become bigger, the Construction Industry professional’s goal is to provide best-in-class construction materials. Materials that meet the ever perpetual need of time-cost-quality-environment-safety and also have characteristics precisely addressing the changing dynamics of locational requirements are the need of the hour. HIGH STRENGTH CONCRETE, HSC in short, is that material which precisely meets all these aspirations and more. Whats more, HSC offers itself to innovation and upgrade.

HIGH STRENGTH CONCRETE is the Smart Material of today. All Stake holders in any Construction project necessarily need to have proper understanding of this agile and versatile material as well as understand the immense intrinsic advantages that HSC provides. To ensure that maximum benefit accrues by adopting HSC, one also needs to have a proper understanding of Design, preparation and placing of this amazing material.

The Indian Concrete Institute – Bengaluru Centre (ICI-BC) is a pioneer professional organisation, a not-for-profit entity, which is at the forefront of bringing application-oriented body of knowledge to update the know-how of Engineering Professionals and help build the skills in the Construction and Infrastructure Industry. In line with this continuing endeavour, ICI-BC is organising a **1-day Seminar titled “High Strength Concrete” on 13th February 2019, Wednesday, at The Capitol Hotel, Raj Bhavan Road, Bengaluru.** Get to know more about High Strength Concrete. Experts and hands-on Professionals will speak on vital aspects of High Strength Concrete. Please register early to book your seats in advance, as registration is limited.
