## About The Institute

Bangalore Institute of Technology is one of the premier institute imparting quality education since 1979 under Rajya Vokkaligara Sangha (RVS), Bangalore. The institute is affiliated to Visvesvarya Technological University, Belguam, Karnataka and approved AICTE, New Delhi. The Institute has 9 UG programmes and 10 PG programmes. All the Departments of the Institute have well established research centers to pursue quality research. Teaching and Technical staff are highly qualified and well experienced. BIT has an exceptional placement cell which provides placement for the students.

## About The Department

The department of civil engineering was established to train and developed civil engineering professionals who will be sensitive and serve for the betterment of the society. The civil engineering department is one of the first departments established by the college during 1979. The department of structural engineering is doing its best with the support of competent faculty and well equipped laboratories to develop quality structural engineering professionals. The department is working at its best to reach out the requirements of expectations of industries from students and to bridge the gap between academics and industries. This workshop is one of the step being taken by the department to help the students in acquiring knowledge beyond the syllabus.

## About The Workshop

Bangalore Institute of Technology is conducting workshop on Evaluation of software packages and design capabilities. Softwares such as ETABS, ANSYS, STAAD pro and CYPE are the major fields of interest. There has been a great thrust to train PG students to meet the requirements of construction industry. The main objective of the workshop is to create a platform and facilitate the knowledge sharing on evaluation of softwares being used in the construction industries among the PG students who are just away from entering into the industries. As the need of software knowledge is very much required for the design and analysis of structures, this workshop will be aimed at expanding the knowledge of the above.
