ABOUT FDP:

Construction industry is one of the largest industries in the world, and one that has the highest stakes. Construction project management is the art of undertaking a construction project to meet its cost, time and quality deadlines in a sustainable way. This Faculty Development programme starts with the introduction of the special nature of civil engineering project. It introduces the basic learning requirements for the civil engineer project manager and makes the appreciation for the qualitative nature of the construction project management. The philosophy of the course is more on system approach contrary to majority of mechanics based subject. This interactive faculty development programme accompanied with understanding different phases of a construction project, Learning how to manage resources within the given budget and timeline, Predicting effectiveness and efficiency of a project and also this FDP gives you a unique opportunity to experience what happens in a real Civil Engineering project.
