

Indian Concrete Institute

Bengaluru Centre, Karnataka

IN ASSOCIATION WITH

INVITATION

EVENING TECHNICAL LECTURE ON

“CONCRETE DURABILITY BY PERFORMANCE”

BY PROF. TOM HARRISON

ABOUT SPEAKER: Professor Tom Harrison is an independent consultant, expert witness and Visiting Industrial Professor at the University of Dundee, Scotland. In 1993, he became the Technical Director of the British Ready Mixed Concrete Association taking over from another stalwart Joe Dewar. At the same time, he took over as Chair of Concrete Committee of the British Standards Institute (BSI), which he retained for 19 years. During this period, he piloted development of British Standard BS 8500 (2006) which is an important contribution to service life design of structures and notably responsible for introducing RCA in BS 8500. He has also authored several reports for industry such as CIRIA 108 and key publications of the European Ready Mixed Concrete organization (ERMCO) as well. Professor Harrison is an Editorial Board member of the prestigious journal *Magazine of Concrete Research*.
