About IWC:

IWC - one of the two flagship events of the INDIAN CONCETE INSTITUTE - is a quin-quennial event, organized for dissemination of original ideas, Research, recent developments in Concrete Technology and its application. It was held for the first time in 1993 at Bengaluru. ICI Kolkata Centre hosted the 2nd edition in 1998 and since then this is the seventh edition which is going to be held in Kolkata again after 25years. As has become the hall-mark of this event, this time also, this symposium is expected to draw a large number of foreign and national speakers of reputes as well as delegates. Participants to this event shall be from various facets of concrete Industry, cement Industry, construction Industry and allied Equipment and Construction Material World including manufacturers, Engineers, Architects, Academia, Researchers and Policy makers - both from the Government and Private sector. This event shall provide a unique platform to the attendees and facilitate discussions about Innovations and Technologies amongst other relevant information. This is also a good opportunity for interaction amongst Industry experts so as to develop network with who's who of the Concrete and Civil Engineering Industry for beneficial collaboration in various aspects including research and profession.
